

## **Quick Start**

### **Electricity Monitoring System with Ethernet/Wi-Fi (2.4GHz) connectivity**

**EB-EW-E2(-SUB), EB-EW-E3(-SUB)**

For applications not exceeding 600Vac

### **Before Getting Started**

This Quick Start provides high level installation instructions. Visit [eyedro.com/support](http://eyedro.com/support) for complete product setup guide, warranty information, user manuals, videos, and various online support resources.

Installation may require the cover of the main electrical panel to be removed while some wires are still electrified. Even when the main breaker has been turned 'OFF' certain areas of the panel may still be dangerous and carry the risk of shock, burn, and electrocution. Installation should be performed by a qualified electrician. **DO NOT attempt installation unless you know where electrified areas within the panel are.**

**This product is intended for indoor use only.  
This product contains no user serviceable components.**

## 1. Record Device Serial Number (located on module label)

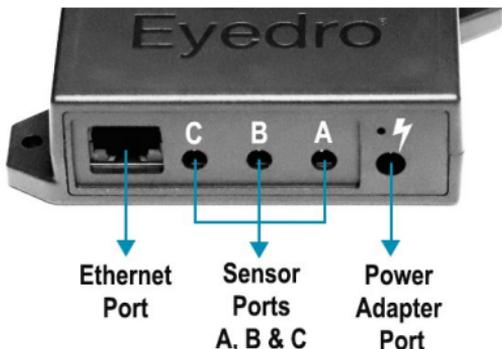

## 2. Install Hardware

- i. Install current sensors on the **line**(/live/hot) conductor of the circuit(s) to be monitored.

- ii. **Optional:** If internet communication will be provided by Ethernet, connect an Ethernet cable between the Eyedro module and an available port on your network equipment.

- iii. Connect sensors and power adapter to the Eyedro module.  
*Note: Sensor port C is only available on 3 sensor models*

## 3. Connect to the Internet using Wi-Fi

- i. Use your computer or mobile device to search for and connect to the Wi-Fi network created by your Eyedro device: **Eyedro [SerialNo]**.
- ii. Open a web browser tab and go to **eyedro.com/setup** - if you are not automatically redirected there when you connect.
- iii. From the Wi-Fi Settings page, select the **name** (Network SSID) and enter the **password** (Key) for the Wi-Fi network in your building. Click **Connect**.

## 4. Add Device to your MyEyedro User Account

- i. Go to **my.eyedro.com** to create your online account (or log in if you have an existing account).
- ii. Add the device(s) using the Device Configuration page. You will need the serial number(s) you recorded in Step 1.
