# 3.Samsung SmartThings

Samsung SmartThings integration with MyEyedro:
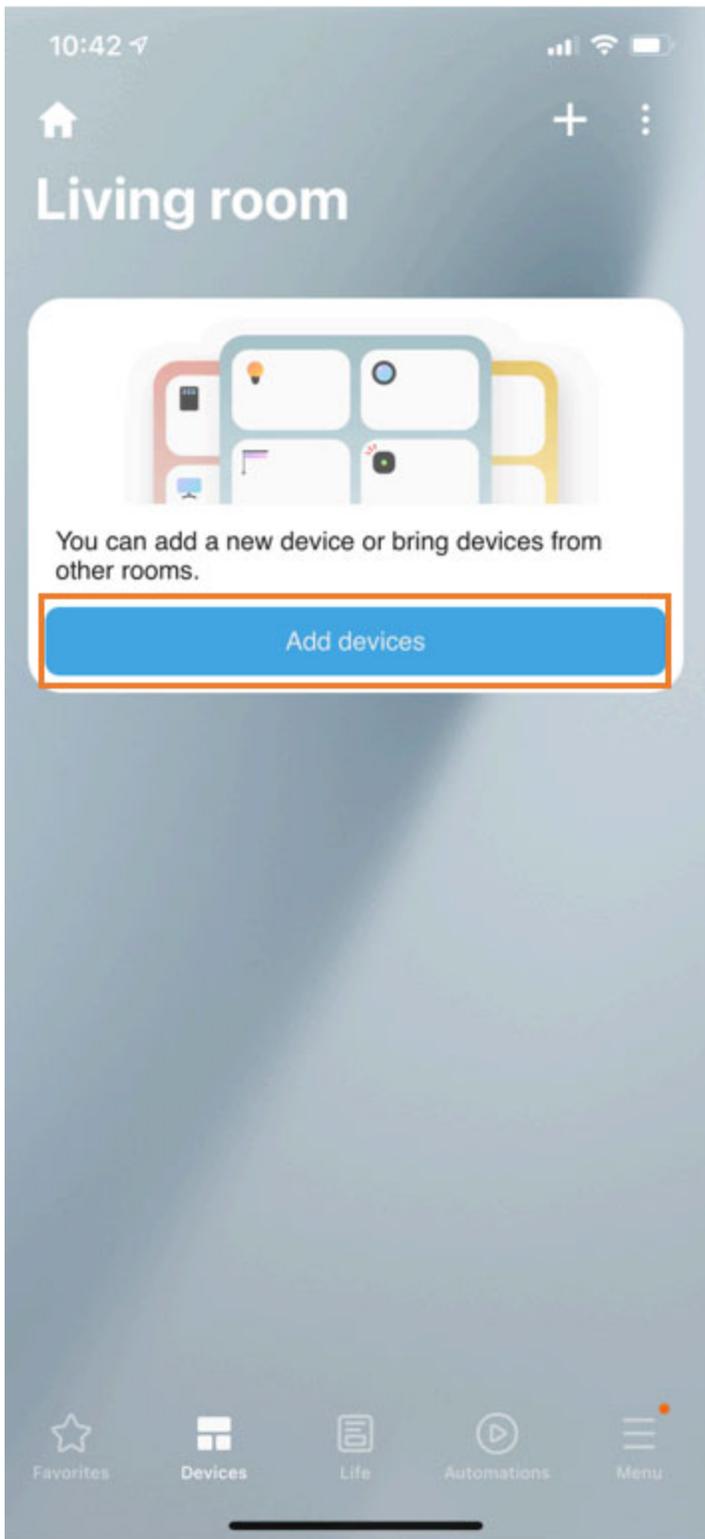

What it can do:

The MyEyedro electricity monitoring cloud service presents your electricity data in ways that are engaging, informative and easy to
understand. See real-time electricity usage and gain access to many helpful features that help you uncover waste, manage costs and
take control of your electricity use. Now you can even access your electricity information through your SmartThings mobile app. This skill requires that the user has a valid MyEyedro user account with a supported Eyedro electricity monitor installed. Visit http://eyedro.com for more information.
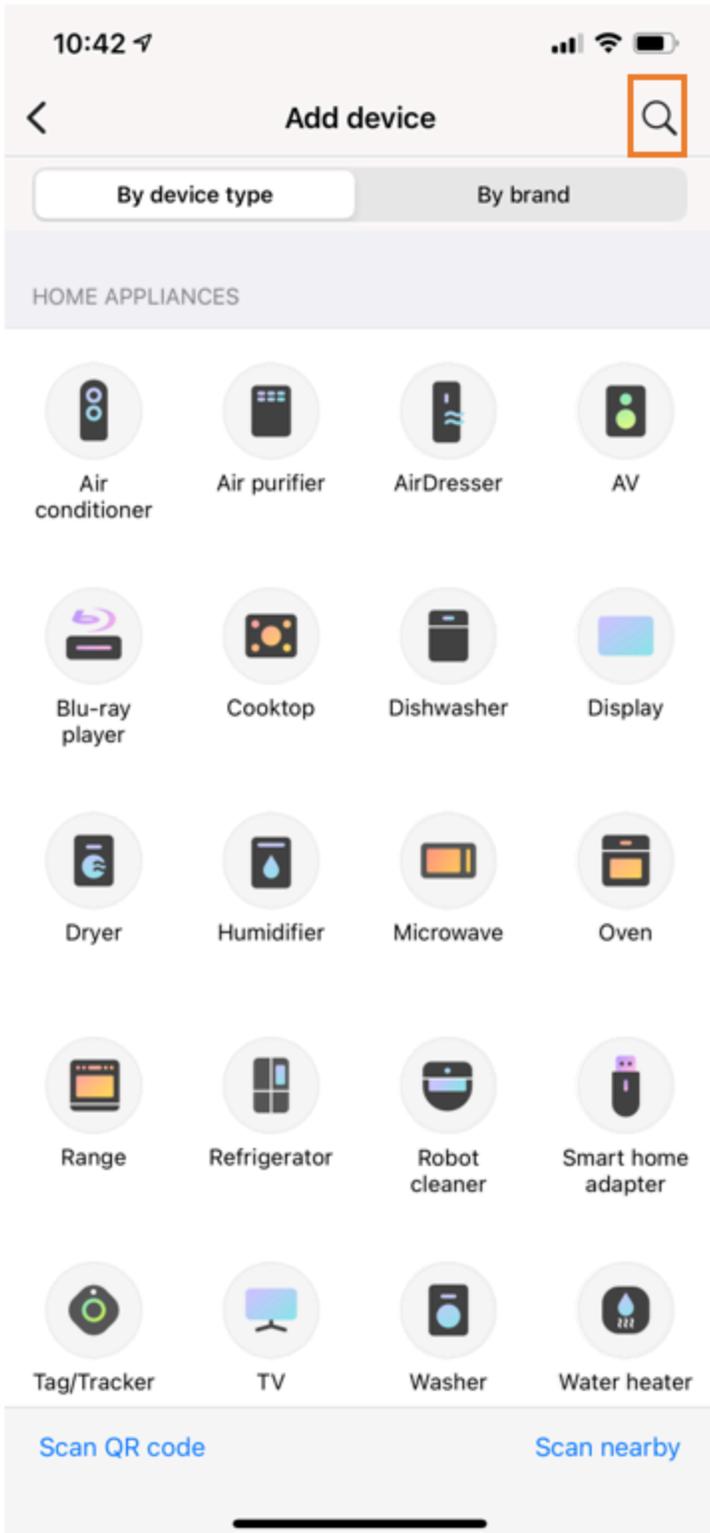

How to setup:

1. Ensure you have the Samsung SmartThings mobile phone app. This can be downloaded from the Play Store or App Store.

2. From the home screen of the mobile app, navigate to the device tab in the bottom bar.

3. Click Add Devices.
